# Loading Info.Questionary ----- SOLAR HOME SYSTEMS

Dear Sir/Madam, thanks for your enquiry! In order to design the most suited solar power system for your market with the related load or electric appliances, please fill the information into the blue grid. We will offer the most appropriate & reasonable solar power system to ASAP.

**Project information**

Country:  City:

Continuous cloudy and rainy days:

**ALSO PLS provide us the following information, we can design an optimal system for you!**

- 1.Where will the Solar Power System be installed and how is the local solar Radiation?
- 2.What is the total power of the system to be loaded and how many hours does It work each day?
- 3.What is the requirement for output voltage, DC or AC?
- 4.How many rainy or cloudy days will the system work continuously?

Pls make a list for ALL the Loads that will be powered by this solar system as following example.We will design & quote the system accordingly

No.	Load Name	Watt of load	Total Load quantity	Working hours per day	Load working Voltage	DC/AC
For example:	TV Sets	50w	2	6	220v	AC
